

## Ologies and isms

The ideologies were mistaken  
and none of them have succeeded  
But they are still being heeded  
by lots and they're not faking

How simple it is to see  
through the colourful prisms  
of the us and them and we  
of the ologies and isms

You can find prejudice and pride  
in the party, in the sect  
A place for the loonies to hide  
and act politically correct

What ologies rule us today  
What isms are guiding our way  
Whatever you want me to say

How simple it is to see  
through the colourful prisms  
of the us and them and we  
of the ologies and isms

The ideologies were mistaken  
'cause none of them have succeeded  
So what's currently in our prism  
Perhaps it's just - ologism?

What ologies rule us today  
What isms are guiding our way  
Whatever you're willing to pay
