

## **Uunartoq Qegertoq (Warming Islands)**

Many governments don't understand  
that our climate is actually warming  
But mr. Harper and mr. Bush  
they had carefully noted the warning

So have Copenhagen and Oslo  
Reykjavik's next in line  
Stockholm, Helsinki and Moscow  
they are not at all that far behind

Now that the heat is on  
and melts the polar ice  
Below is oil and gas  
They want to get a slice

The Russians built themselves a mental bridge  
It goes all the way from the North Pole  
to what's known as Lomonosov Ridge  
You bet it's full of oil, gas and coal

Canada wants more Arctic hubs  
Don't you see what this is all about  
When the US sends the nuclear subs  
it's oil and the arctic sea route

Yeah the heat is on  
Leave all the worries to Gore  
Until we have won  
our part of this cold war

Scrambling for islands under the sea  
is hardly a prescription for peace  
How ironic that soon you and me  
could end up as climate refugees

Now that the heat is on  
and melts the polar ice  
Until we have won  
our part of this cold war

Greenland just got a new island  
Uunartoq Qegertoq  
The warming island  
The warming island
